Simplify your GDPR compliance with an out-of-the-box solution for school records.
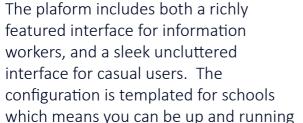

RM4ED

RM4ED

Desgined specifically for schools, RM4ED combines best-of-breed electronic document & records management (EDRM) technology with convenience of the latest cloud infrastructure.

The plaform includes both a richly featured interface for information workers, and a sleek uncluttered interface for casual users. The configuration is templated for schools which means you can be up and running right away.

And because it's cloud-based there are no expesive up-front licence fees, or costly infrastructure to manage.

Secure environment with targetted access controls. Security built in from outset.

SaaS. Infrastructure, licensing and configuration all taken care of.

Retention & Disposal schedule. Compliance with Data Minimisation principle 3 of GDPR.

Designed for schools. Templated solution based on analysis and research.

Supported by experts. Decades of experience in information and records management.
